

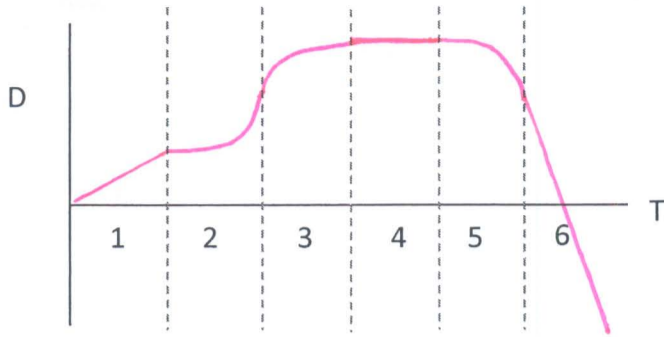

Graphing Exit SlipDraw the d vs t and the v vs t graph for the following description:

- 1 The kitten starts out moving forward at constant speed.
- 2 Then the kitten sees a fly in front of her and accelerates to go catch it.
- 3 Nearing the location of the fly the kitten slows to a stop.
- 4 The kitten remains stationary while attacking the fly.
- 5 The kitten then turns around, starts slow and accelerates to a run back towards her starting position.
- 6 When she reaches a pretty fast speed she holds that speed constant and continues past her start point looking for a toy.
