

## Anatomy Review

Test contains question about:

Pig Dissection – 28

Digestive System – 17

Respiratory System – 8

Circulatory System – 18

Excretory System – 4

To study you should use:

Pig Packet Diagrams (same as on the test!)

Digestive Review Sheet – extras posted online

Circulatory Review Sheet – extras posted online

Below Word Bank & other worksheets

### **Respiratory System & Excretory System:**

*For the Respiratory System you should:*

1. Be able to trace a molecule of O<sub>2</sub> as it enters the body and the path it takes until it leaves as CO<sub>2</sub>
2. Identify all of the structures of the system in a diagram
3. Describe how you breathe in and out
4. Describe the structure of an alveolus and how that aids in its function

*For the Excretory System you should:*

1. Identify all of the organs that are involved with excretion of metabolic wastes
2. Trace the nitrogen waste out of the body
3. Identify all of the structures of the urinary system in a diagram
4. Explain the purpose of a nephron

**Word Bank** – be able to identify the structure and function of the following:

Inspiration	Expiration	Pharynx	Larynx
Trachea	Alveoli	Medulla Oblongata	Nasal Cavity
Bronchus	Bronchioles	Diaphragm	Deamination
Kidney	Ureter	Urethra	Nephron
Bladder	Renal Artery	Renal Vein	Epiglottis
Filtration	Reabsorption	Parietal Cells	Spleen
Pericardium
